B.M.C. 1100 WIPER ARMS AND BLADES

The B.M.C. 1100 Mark I is fitted with a DR3A wiper installation incorporating wiper arms (Part No. 54715782) and blades (Part No. 54711283).

The Mark II models (1100 and 1300) produced since October 1967 are fitted with the more powerful 14W motor. To take advantage of the extra power available, higher pressure wiper arms (Part No. 54701977) and new blades (Part No. 54702170) are fitted.

It is emphasised that these arms and blades are not interchangeable. When ordering replacement parts, it is essential to quote the correct part numbers for Mark I or Mark II vehicles, as given above.

Failure to observe this would result in severe overloading of the DR3A motor if Mark II arms and blades are fitted to the Mark I vehicle.
