

SERVICE INFORMATION

LAND-ROVER

Vol. 2 Issue 11

April, 1975

ITEM 24 Division : 00
 Subject : Vehicle storage
 Models : All
 Remarks :

The attention of Distributors and Dealers is drawn to page 8 of the Policy and Procedures Manual, Part No. AKD8000 on vehicle storage. Adherence to the contents of this section will ensure maximum protection during periods of storage.

ITEM 24A Division : 99
 Subject : Pernumeter measuring instrument
 Models : All
 Remarks :

The Pernumeter is a new pocket sized instrument designed to measure angles of inclination easily and accurately. Within our own Service Organization, the Pernumeter has been found most useful in checking propellor shaft inclination and in particular, it has enabled accurate measurement to be made of the final drive flange and gearbox flange inclination. As such, it is extremely valuable in determining any mis-alignment between the flanges which can induce propshaft vibration.

Other possible uses within a Service Workshop are :-

1. Checking certain types of castor – camber angle gauges where the gauge itself has an adjustable spirit level and scale reading.
2. Assisting in the correct installation and setting up of automatic reel safety belt units.
3. Checking for correct inclination of clutch release lever on clutch shaft of certain vehicles.

These are but a few applications and they can be expanded, so making the tool a worthwhile piece of equipment for workshop use.

The Pernumeter has our approval and we confidently recommend the purchase of the instrument to our Distributors and Dealers. In accordance with our normal Policy, it is not our intention to stock these instruments, but attached is a form on which they can be ordered direct from Gelmant Control Systems Limited at a special price of £4.95 each nett **within the U.K.** This is a saving of over £1.00 on the normal recommended price.

When using the order form will U.K. Distributors and Dealers please ensure that it is accompanied with a crossed cheque or postal order, made payable to Gelmant Control Systems Limited.

For countries outside the U.K. queries relating to purchase of the Pernumeter should be directed to :-

Gelmant Control Systems Limited,
5 Shirlock Road,
London
NW3 2HR.
