LAND-ROVER SERVICE NEWS LETTER

No 2

September 1960

Item 8 SUBJECT: **ELECTRIC HORN**

MODELS: Land-Rover Series II.

MODIFICATION: Electric horn repositioned at front of vehicle to improve audibility.

PART NUMBERS:

Electric horn	1	514887
Support for air cleaner, battery and electric horn	1	509867
Extension harness for horn LU. 54946709	1	514895

REMARKS: The latest type horn, which can be identified by its position on the vehicle, that is, on the front of battery carrier instead of under rear of front wing adjacent to the dash, can be used on any earlier Land-Rover Series II model, providing all the parts listed above are supplied and fitted.

Item 9 SUBJECT: **CONTROL MECHANISM FOR DASH VENTILATOR**

MODELS: Land-Rover Series II.

MODIFICATION: Introduction of lever type control mechanism for the dash ventilator, to give quicker action.

PART NUMBERS:

Control mechanism for dash ventilator	2	332326

REMARKS: The latest type control mechanism for the dash ventilators can be fitted to any earlier Land-Rover Series II model, but from an appearance point of view they should be fitted in pairs, see illustration below:

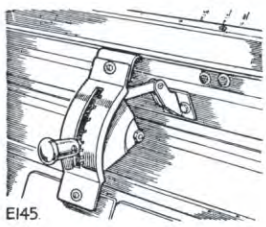

Fig. 1—Control mechanism for dash ventilator, lever type

To operate, push the lever up into one of the slots to give a suitable opening of the ventilator lid.
